

Rule name *
Block Social Media and Streaming Applications

Description
Block Social Media and Streaming

Rule group
None

Action
Accept

Log firewall traffic
Logs traffic, matching this firewall rule, on the appliance (by default) or on the configured syslog server.

Source

Select the source zones, networks, and devices.
The rule applies to traffic from these sources during the scheduled time period.

Source zones *
LAN
[Add new item](#)

Source networks and devices *
Any
[Add new item](#)

During scheduled time
All the time
Select to apply the rule to a specific time period and day of the week.

Destination and services

Select the destination zones, networks, devices, and services.
The rule applies to traffic to these destinations.

Destination zones *
WAN
[Add new item](#)

Destination networks *
Any
[Add new item](#)

Services *
Any
[Add new item](#)
Services are traffic types based on a combination of protocols and ports.

WAN

Security features

Web filtering

Web policy
Social_Media_Blocked

- Apply web category-based traffic shaping
- Block QUIC protocol

- Malware and content scanning**
- Scan HTTP and decrypted HTTPS
 - Use zero-day protection
 - Scan FTP for malware

- Filtering common web ports**
- Use web proxy instead of DPI engine
 - [DPI engine or web proxy?](#)
- Web proxy options**
- Decrypt HTTPS during web proxy filtering

Security features

Web filtering

Web policy

-
- Apply web category-based traffic shaping
- Block QUIC protocol

Malware and content scanning

- Scan HTTP and decrypted HTTPS
- Use zero-day protection
- Scan FTP for malware

Filtering common web ports

- Use web proxy instead of DPI engine
- DPI engine or web proxy?
- Web proxy options**
- Decrypt HTTPS during web proxy filtering

[Configure Synchronized Security Heartbeat](#)

Other security features

Identify and control applications (App control)

-
- Apply application-based traffic shaping policy

Shape traffic

-

DSCP marking

-

Detect and prevent exploits (IPS)

-

Anybody	<input checked="" type="checkbox"/> Video hosting				<input checked="" type="checkbox"/> ON
	Default action				

Search engine enforcement

Enforce SafeSearch

Enforce additional image filters

Prevent potentially inappropriate images, videos, and text from appearing in Google, Yahoo, and Bing search results. You can reduce the risk of exposure to explicit content by enabling additional filters that display only images with a Creative Commons license.

This option can be enforced by the web proxy only.

Enforce YouTube restrictions

Restriction level

Prevent access to potentially inappropriate content by restricting which videos are returned in YouTube search results.

This option can be enforced by the web proxy only.

Policy Quota Status

Allowed time quota Hours Minutes

Set the maximum allowed time for a single user to browse web content that falls into categories restricted by a quota policy action.

Policy Quota Status

Allowed time quota Hours Minutes

Set the maximum allowed time for a single user to browse web content that falls into categories restricted by a quota policy action.

Advanced settings

Enable logging and reporting

Prevent download of files larger than MB

Values between 1 and 1536 MB are permitted

Add X-Forwarded-For header to outgoing HTTP requests

This can expose the user's internal IP address. Only use it with a properly configured upstream load balancer or proxy.

⚠ This option can be enforced by the web proxy only.

Restrict login domains for Google apps

Allowed domain(s)

A comma-separated list of allowed domains for Google apps

⚠ This option can be enforced by the web proxy only.

Apply Microsoft Azure AD tenant restrictions

Restrict-Access-To-Tenants

Comma-separated list of domain names and domain IDs in GUID format

Restrict-Access-Context

Directory ID of the tenant setting the restrictions in GUID format

⚠ This option can be enforced by the web proxy only.
