

## Sophos APX (Wi-Fi 5) Licensing Guide

The Sophos APX Series is our range of Wi-Fi 5 access points. For Sophos Central management, we recommend our latest range of Wi-Fi 6/6E access points, the AP6 Series.

Management Platform	Cloud-Managed	Firewall-Managed
	Sophos Central	Sophos Firewall OS Wireless Protection
How to Buy	These access points can be managed without the need for an additional subscription.	<b>Perpetual License Per Appliance</b> (incl. in Base Firewall License)

### Access Points (sold separately)

Management	Firewall management will not be offered for the AP6 Series. Please use the Wi-Fi 5 APX Series if you require firewall management.

Keep Broadcasting SSID	✓		

1. Management in Sophos UTM is also possible for indoor APX models.

2. In Sophos Central, Sophos Wireless supports Synchronized Security with Sophos Endpoint, Sophos Intercept X, Sophos Mobile, and Sophos Server Protection. Sophos Wireless can use the Security Heartbeat of any Sophos Central managed endpoint, mobile device, or server connected to an APX-powered Wi-Fi network to display and act upon the health status and put the connected client/server in a Walled Garden with restricted web access. Synchronized Security between Sophos Firewall and Sophos Central managed endpoint or Intercept X is also available and offers a broader feature-set than what is currently available with Sophos Wireless.

3. Walled Garden for APX managed in Sophos Central in combination with Synchronized Security.
