

## XenServer AutoStart VMs

Xe vm-list

```
[root@xensrv01 ~]# xe vm-list
uuid ( RO)          : d19a4a0d-4d9a-d22b-7bcc-449c270e0bff
  name-label ( RW): Sophos UTM
  power-state ( RO): running

uuid ( RO)          : 674a4dfa-c83b-1326-1ffa-f635903ba476
  name-label ( RW): Ubuntu_PiHole
  power-state ( RO): running

uuid ( RO)          : 544e6aa7-11b0-408d-9b55-ae6ddf8e940f
  name-label ( RW): Control domain on host: xensrv01
  power-state ( RO): running

[root@xensrv01 ~]#
```

Get the UUIDs and do the following:

```
xe vm-param-set uuid=d19a4a0d-4d9a-d22b-7bcc-449c270e0bff other-config:auto_poweron=true
```

```
xe vm-param-set uuid=674a4dfa-c83b-1326-1ffa-f635903ba476 other-config:auto_poweron=true
```

```
xe vm-param-set uuid=544e6aa7-11b0-408d-9b55-ae6ddf8e940f other-config:auto_poweron=true
```
