## License Migration for SFOS

You can migrate Licenses from CyberoamOS to Sophos Firewall OS (SFOS) from **System > Maintenance > Licensing** at the time of migration:

The screenshot shows a 'License Upgrade' window. Under the 'Upgrade Type' section, there are two radio button options. The first option, '30 Day Full Guard Trial', is selected and includes a subtext: '[ Review all the features without affecting your existing license and with an option to roll back to the previous version ]'. The second option is 'Migrate License', with a subtext: '[ All the existing licenses will be migrated to Sophos Firewall OS. This will result in a license of equivalent value to your current one. ]'. At the bottom left of the window is a blue 'Upgrade' button.

For migration into SFOS, you have Two (2) options:

- [Upgrade to a 30-day Full Guard Trial License](#)
- [License Migration](#)

### Upgrade with 30-day Full Guard Trial License

On upgrading to 30-day Full Guard License, all feature licenses will be applied to the Appliance for 30 days including Web, Email, Web Server and Network Protection Modules. The existing Cyberoam licenses will be intact and keep elapsing as normal.

At any point during the 30-day period, you can opt for License Migration, details of which are given in the next section. After 30 days, when the 30-Day Full Guard License expires, you will have to migrate you licenses manually from the Cyberoam Customer Portal.

Also, during the 30-day period, seamless rollback to CyberoamOS is possible just by rebooting appliance with the Cyberoam firmware.

### License Migration

**Migrate License** option will provide you with an SFOS license of equivalent monetary value as your Cyberoam License. To make it easier to renew licenses, on migration, those with single-module subscriptions will be provided a subscription bundle. Bundles contain multiple features apart from the migrated module, which acts as an added bonus (Details given in table below).

If all current subscriptions do not expire on the same day, the new license expiry dates may vary from the current ones and individual features could have an earlier or later expiry date. This will result in a license of equivalent value to your current one.

#### Note:

- If different modules of your Cyberoam subscriptions expire on different dates, the expiry dates of the migrated bundled subscription(s) would be calculated in such a way that the monetary value of your new subscriptions are equivalent to your Cyberoam subscriptions.
- After transfer of Licenses, rollback to CyberoamOS is NOT possible. Hence, if you have an unused subscription key for Cyberoam, it is advised to apply it before you migrate to SFOS.

## Single Subscription Transfers

Cyberoam Subscription	Equivalent SFOS subscription	Bonus Features
Base (Firewall+VPN+Wireless)	Essential Firewall (Firewall+VPN+Wireless)	
IPS	Network Protection (IPS+RED+Advanced Threat Protection)	RED/HTML5, ATP
Web/App Control	Web Protection (URL Filter+Application Control+Web Anti-virus)	Web AV
AS	Email Protection (Anti-spam, Email Anti-virus, Email Encryption, Data Protection)	Email AV, SPX, DLP
AV	Web Protection (URL Filter+Application Control+Web Anti-virus) + Email Protection (Anti-spam, Email Anti-virus, Email Encryption, Data Protection)	Anti-spam, Web & App Control, SPX, DLP
WAF	Web Server Protection (Web Application Firewall, Web Anti-virus, Reverse Proxy)	Web AV, Rev.Proxy
Outbound AS	Email Protection (Anti-spam, Email Anti-virus, Email Encryption, Data Protection)	Email AV, SPX, DLP
8x5 Basic Support	24x7 Enhanced Support	24x7 support
24x7 Premium Support	24x7 Enhanced Plus Support	

**Bundled Subscription Transfers**

Cyberoam Bundle Name	Security Modules	Equivalent Copernicus Subscription
NGS	IPS, Web/App Premium Support	EnterpriseGuard, E2E+ Upgrade
SVS	IPS, Web/App, AV Basic Support	FullGuard
SVSP	IPS, Web/App, AV Premium Support	FullGuard E2E+ Upgrade
TVS	IPS, Web/App, AV, AS Basic Support	FullGuard
TVSP	IPS, Web/App, AV, AS Premium Support	FullGuard E2E+ Upgrade
CVS	IPS, Web/App, AV, AS, WAF Premium Support	FullGuard E2E+ Upgrade
AV-AS	AV, AS	Web Email
