

XDR & EDR Data Lake EAP

Known issues

Known Issues

Issue	Details	Impact	Notes
CESG-15193	For Linux server devices, 'Server Intercept X XDR' EAP license usage is counted even if the Linux server has not added to the XDR & EDR Data Lake – early access program.	Low	The EAP Manage devices page does accurately report the devices that have been assigned to the early access program.
	Admins must select devices when running a query pivot.	Low	When running a new query from the results of an existing query, currently admins will need to select the devices that the new query will be applied to.
